Why Prodege

A cutting-edge marketing and consumer insights platform, Prodege has charted a course of innovation in the evolving technology landscape by helping leading brands, marketers, and agencies uncover the answers to their business questions, acquire new customers, increase revenue, and drive brand loyalty & product adoption. Prodege stands ready to support our clients with anything from sample to full service custom studies and anything in between. Our APIs connect sophisticated buyers with our panel in real time. Peeq is the only sampling platform in the market with full access to Prodege sample. Pollfish, our end to end DIY platform, offers the easiest to use survey building tools. Our Full Service solutions allow researchers to create any type of survey in any environment to support the best panelist experience. Across all of our offerings, our Global team stands ready to support your needs 24/7.

Our Commitment

Service that goes above and beyond

Sampling Integrity and Quality

Best in class Technology,

Prodege Quality Shield™

Quality is central to all we do. We utilize a variety of methods to ensure the highest data quality and are in compliance with GDPR and CCPA.

Because Quality Doesn't Start at the Survey

At Prodege, we know audiences. Our leading consumer rewards platform has taught us what motivates people—and what drives them away. Protecting this ecosystem means protecting our participants and our brand: fraudsters aren't welcome.

Quality has never been a selling point for us—it's been the standard. For over 15 years, we've disciplined controls to protect our members and platform, maintaining fraud rates well below industry averages—even as others climb past 25%. And we don't just rely on our own systems—our proprietary anti-fraud technology is backed by rigorous external validation, ensuring every sample meets the highest standard of data integrity.

Today, more than ever, ensuring quality requires more than a single checkpoint.
It requires a shield that never rests!

Prodege QualityShield is a multi-layered respondent verification and fraud prevention system designed to protect research data **from the first point of respondent interaction through final response submission.**

A double opt-in registration process including:

Digital Fingerprinting

CAPTCHA

Physical Address Verification

Mobile Verification

Device Verification

Third Party Validation Methods

QualityShield applies multiple layers of technology and behavioral analysis across the entire respondent lifecycle—from recruitment and account creation to device verification, survey entry screening, in-survey monitoring, and post-survey validation.

**Every stage
is evaluated.**

**Every interaction
is monitored.**

**Every respondent
is verified.**

Because protecting data quality doesn't happen at one moment in the survey process—it happens across the entire respondent journey.

Prodege QualityShield: Multi-layered Protection.

Instantly blocks low-quality traffic & duplicate devices

Detects bots, emulators, and professional survey farms.

Pre-survey checks ensure attentive, authentic humans.

QualityShield is built into every Prodege project—and available in DIY or programmatic solutions—so you get the same top-tier data protection, every time.

What QualityShield Delivers

The **prodege**™ Difference

Prodege's contributions have been instrumental in our success. You consistently think ahead and proactively identify potential challenges...That kind of foresight is really valuable and much appreciated. Your ability to accurately interpret and execute complex requests—ensuring the right quota groups are targeted—has been key to hitting our targets on time and ensures the data quality that we need.

Prodege QualityShield protects your research from the moment a respondent enters the ecosystem—because data quality shouldn't start at the survey, and it shouldn't stop there either.

Sampling

We offer the deepest sampling expertise in the industry.

Every project we support on our clients' behalf is managed by intelligent and experienced sampling design experts.

Our team of 100+ highly experienced global project managers proactively anticipates our clients' needs to ensure we deliver on time and on budget.

Global Panel Access

The world is a big place, let us help you reach who you need wherever they are!

Prodege's
International Reach

Our Panel

Prodege is a leading provider of people driven insights for the market research industry. Through diversified recruitment methods and a world-class consumer engagement model, we deliver a more thoughtful approach to research.

Our breakthrough model fosters member retention and ongoing participation. This brings many benefits to our clients, including delivery of re-contact surveys, longitudinal studies, in-home use tests, and ongoing research programs.

Here are some of our featured panels:

Established in 1996, MyPoints has built one of the longest running and most respected online market research panels in the industry. Through its long- standing partnerships with firms such as United Airlines, Hilton Hotels and many more, MyPoints has developed extremely strong profiling for B2B, B2C and many specialized audiences delivering the highest quality results.

InboxDollars proprietary panel joins Prodege and expands our global access. Founded in 2000, with expansion into the UK in 2012 and Canada in 2014, this unique group of registered members enhances the scale and breadth of our overall reach.

ySense provides us with an international respondent base. We are now able to offer stronger feasibility and overall performance in Asia, Latin America, Eastern Europe, and Africa.

Upromise is the leading credit card rewards program for parents looking to save for life events like college tuition. This brand gives Prodege access to parents of children of all ages.

Frequently Asked Questions

What steps do you take to achieve a representative sample of the target population?

Through our wide range of recruitment channels and offerings, Prodege ensures a diverse composition of people that represent the population required. We maintain a database of over 1,000 demographic and behavioral attributes that are utilized to access sample for our clients' projects. Our experienced Project Management Team starts by understanding our clients' requirements (e.g. a nationally representative sample, or a specific targeted group) and the number of responses needed, ensuring the sample plan is optimized and executed accurately.

What profiling data is held on respondents and how is it kept up-to-date? If no relevant profiling data is held, how are low incidence projects addressed?

Prodege tracks and stores thousands of demographic and behavioral attributes through several channels, including completion of a 20-question profiling survey upon joining the panel. In addition, our members participate in our Daily Poll in which we receive up to 100,000 unique responses in a day which are then appended to their profile. Behavioral data is collected

through member engagement with our Search, Offers and Shopping channels to create additional data points passively. If a project requires targeting on criteria not currently captured in member profiles, we can prescreen in real-time and gather tens of thousands of responses within a matter of hours.

Member profiles are updated on an ongoing basis, with continuous refreshing to ensure data remains current. Utilizing our proprietary technology, member data is collected and stored real-time during the registration process, in follow-up surveys, and on the member website. Members can proactively update their profile at any time, or we may send out push notifications letting them know their profile is not complete, or needs updating. Additionally, profiling data collected in a survey can be sent to our database and updated real-time.

What are your quality process? Do you have in place procedures to reduce or eliminate undesired within survey behaviors, such as (a) random responding, (b) Illogical or inconsistent responding, (c) overuse of item non-response, or (d) speeding?

At Prodege, we take data quality very seriously. We have our own in-house compliance department dedicated to monitoring and eliminating fraudulent panel

members. We combine industry-standard data quality solutions provided by third-party partners, along with our own proprietary techniques to ensure our panel exceeds industry standards. Observed offenders are removed from the panel and not allowed to re-register with the panel.

When we are providing survey programming for a project, we implement speeder and straightliner traps, honesty and engagement detection and review open-ended responses. Panelists who fail quality metrics are removed and/or replaced, so clients do not pay for poor quality survey completes. These members are then flagged, and monitored within our panel. Any repeat offenders are removed from our panel.

**Do you have a confirmation of respondent identity procedure?
Do you have procedures to detect fraudulent respondents?**

Prodege has a series of processes to handle member identity and detect fraud. To confirm respondent identities, we work with third-party industry standard data quality solutions to ensure a member is real and unique upon registration. Members are subject to a double opt-in process by initially joining, then opt-in again to join the research panel. Members cannot enroll more than once, meaning they cannot have more than one profile account in the panel database.

In addition, our in-house compliance department continuously monitors fraud and eliminates threats. This may result in removing panel members or shutting out alien technologies caught cheating the system. As part of our reward verification procedure, Prodege's compliance team has also implemented IP address and mobile phone verification. We continue to evaluate and/or implement additional data quality procedures as new capabilities emerge.

To avoid panelist duplication, we have a dedicated compliance team that continuously monitors our users to prevent fraud. To avoid duplication when supplementing with external sources, we employ proprietary and 3rd party digital fingerprinting technologies.
